Investment policy

The Fund is member of a product family called OTP Multi-Asset Funds. The fund units are issued in euro, the fund invests in numerous other investment funds. Thanks to the fund of funds structure, you can build a well diversified international securities portfolio by investing in a single investment fund. The OTP Multi-Asset Funds include both active and passive strategies in each asset class. We select actively managed equity funds, that may overperform their category peergroup thanks to their competent. We select funds with better pat performance and lower volatility according to the appropriate risk management strategy. The funds are selected based on both quantitative and qualitative aspects, relying on the knowledge of the investment process. The funds seek global exposure to both equity and bond markets. This means, that in addition to all American and European exposure, the funds also include a smaller proportion of emerging markets. However, the focus is on the major markets.

Composition of the Fund:
20-60% bond
5-20% alternative assets
35-70% equity

Monthly statement

Macro Environment:

At the beginning of June, the major U.S. equity indices advanced toward new highs, led by technology and AI-related stocks. The labor market expanded more rapidly than expected (172,000 new U.S. jobs were created in May, while unemployment stood at 4.3%), while annual inflation accelerated to 4.2%, reaching a three-year high due to rising energy prices. At its June 17 meeting, the Federal Reserve, chaired by Kevin Warsh, left the benchmark interest rate unchanged at 3.5–3.75%, but signaled that additional rate hikes may still be necessary in 2026 to bring inflation under control. The Fed’s hawkish tone triggered a rise in bond yields in mid-June, leading to a correction in equity markets, particularly within the technology sector. Toward the end of the month, news of easing tensions in the Middle East resulted in lower oil prices, supporting investor risk appetite.

In June 2026, elevated energy prices driven by the Middle East conflict pushed annual inflation in the euro area to 3.2%, prompting the European Central Bank to raise interest rates by 25 basis points on June 11, while the Bank of England kept its policy rate unchanged at 3.75%. Following reports of improving prospects for peace, risk assets rallied sharply: technology stocks, supported by the ongoing AI-driven rally, and tourism-related equities both delivered outstanding gains. European equity markets concluded the second quarter of the year with an increase of nearly 10%, marking their strongest quarter since 2020. By month-end, bond yields had moderated, while the euro weakened against the U.S. dollar, approaching a one-year low.

Changes in the Fund:

At the beginning of the month, we established a position in the healthcare sector. Subsequently, we exited our global clean energy, copper, and electrification exposures. Mid-month, we re-established our electrification exposure and initiated positions in European equities, the Polish market, and biotechnology. Portfolio risks continue to be managed through the use of options. Equity allocation at month-end stood at 46%. We continue to maintain a 20% USD exposure. We significantly increased our exposure to actively managed bond funds, while continuing to keep portfolio duration at a relatively low level.

OTP Multi-Asset Balanced Fund of Funds

Net asset value & price

	Currency	Amount
Net Asset Value*	EUR	62 891 969
Price**	EUR	1,353145

*Total net asset value of the different investment fund series.
